

CAROL AND DAVID TRAVELOGS

www.IslandTerrace.com/cd.pdf

In 1996, Carol wrote her first travelog about her trip to Okinawa. Each year she featured another trip, and each year more people wanted to hear about her trips.

In 1999, Carol married David and a whole new series of travelogs arose. By 2006, 450 people had requested to be on our travelog mailing list, so we turned to the computer for production and mailing list management. In 2007 the number of requests staggered to 1,000 and the travelog grew to 16 pages. Then wouldn't you know it but the USPS sharply escalated postage. In desperation, we turned to a professional mailing house to get our annual travelog mailed. In fact, 550 travelogs went out after Christmas because the printing equipment broke down near-mid-run.

We definitely want to know what's going on in YOUR life, but we are faced with modern-day realities of "travelogs gone amoke" vs "Electronic Communication".

We've made it easy for you to read our travelogs here on the web. However, if you wish to annually receive a postal mailed printed copy we respectfully request at least one annual TELEPHONE or POSTAL correspondence from you. It can be as simple as a post card or a one-minute call. We love to hear from all of you (some of you send your own travelog, thank you!), and it is really discouraging to get back 200+ of our travelogs with no new address for you.
